PROFESSIONAL
EXPERIENCE

Fullstack Software Engineer

Ace Data Systems Co., Myanmar (Outsourcing to D3-SG Co., Singapore)

2023 – 2025

- Delivered scalable blockchain features for real estate applications, working collaboratively with teams in Singapore and Myanmar.
- Enhanced user authentication systems for Tokio Marine Insurance Singapore, streamlining campaign validation workflows and boosting user retention.
- Utilized remote collaboration tools like Slack and Jira to manage projects asynchronously and across time zones.

Frontend Developer

BIGSOFT Co. Myanmar

2023 – 2024

- Redesigned a real estate platform, implementing modern UI/UX designs to enhance user engagement.
- Integrated Google API Geocoding and interactive map features, enabling efficient property searches and on-map property information displays.

Freelance Fullstack Software Engineer

Varous Client

2023 – 2024

- Designed and developed scalable ERP systems, including modules for invoice management, inventory control, and accounting, ensuring seamless integration of financial and operational workflows.
- Implemented automated stock adjustment features, improving inventory accuracy and reducing manual errors.
- Optimized backend and frontend services using Next.js and Express.js to deliver high-performance and user-friendly solutions.
- Built user-friendly quick-create forms for key entities, enhancing system efficiency and usability.
- Developed and maintained a dynamic Learning Center and Agency Services platform with real-time chat capabilities powered by WebSocket.
- Built robust backend systems for student registration and progress tracking, supporting improved engagement and educational outcomes.
